

APPENDIX F—EXPLANATION OF PERMIT MODIFICATION

This is an addendum to the fact sheet accompanying the NPDES Waste Discharge Permit No. WA-002245-4, which was issued to the City of Ferndale on April 28, 2004.

PERMIT MODIFICATION

Influent sampling for BOD is a requirement of this permit because the facility's design criteria are based in part on influent BOD. The permit was issued without a requirement for influent sampling of BOD. Influent sampling and reporting for BOD has been added to the permit and the permittee has been notified to sample for and report influent BOD on its monthly discharge monitoring report as of July, 2004.
